Convertible Private Debt Market

Market Opportunity

The growth in passive investments, ETF's and other factors has resulted in large amounts of capital chasing a very small number of stocks. For example, \$1,000 invested in XIC (TSX ETF) means that about \$386 would be allocated to the top 10 stocks, \$236 to the top 5 and \$0.50 to the bottom 5 stocks.

1. Focus on publicly listed companies sub \$100 million market capitalization

- AIP alpha generated by the following: helping with M&A, capital market expertise, increased liquidity since they are a larger company which may result in higher share prices.

2. Large Potential Market – over 12,000 publicly listed companies with market cap less than \$100 million

3. Private Debt (Senior Secured Convertible Debt) into public companies

- AIP strategy - downside protection with upside participation

Major Equity Indices – Concentrated in a Few Stocks

Target Transaction Type

Target Transaction Parameters	
Industry	Agnostic
Location	North America, Europe and Australia
Loan Type	Debt with upside potential/conversion features
Target Facility Size	\$1 mm to \$20 mm
Target LTV	50%
Currency	CAD or USD
Collateral/Downside Protection	Yes
Security	Corporate Guarantees, strong balance sheet, ability to short sell stock, liquidate assets
Target Term	12 to 36 months with the ability to renew
Target Interest Rate	6% to 9%
Target IRR	12% to 15%
Target Return Attribution	50% for interest/other income and 50% from upside

Thesis Overview:

- **Depressed valuations** - Market dislocation in small cap stocks and recent market correction has resulted in lower valuations.
- **Upside from M&A or market rebound** - Companies which had strong fundamentals prior to the market correction should rebound and resume trading at higher multiples or potentially get acquired.
- **We expect a sharp rebound in convertible debt financings 2024** - High yield debt has become too expensive for high growth companies and significant declines in equity prices makes it difficult to do an equity raise.
- **Paid to wait (6% distribution) with downside protection** - Outperforms traditional benchmarks like convertible and private debt in both bull and bear markets.

Capital Protection:

- Target LTV <50% and Loan to EV <25%
- Target companies with strong management teams, and frictional valuation and/or operational issues that can be fixed;
- Target companies with multiple exits including repayment through cash flow, refinancing, short sale of the stock and liquidating assets.

Market Cap	C\$388mm		Accretive to Portfolio Returns Immediately
Entry Price	\$95		
Exit Price	\$101		

Investment Thesis

- Copper Mountain provided the Fund with greater sector diversification and the opportunity to earn an above average total return usually associated with higher risk loans.
- Last October, the Company announced the sale of its wholly-owned Eva Copper Project in Australia to Harmony Gold Mining Company Limited (NYSE: HMY) for up to US\$230 Million (US\$170M cash on closing). On November 28, 2022, CMMC received Bondholder approval for the sale of its Australian assets subject to proceeds from the sale to be used to partially repurchase US\$87 million of the US\$250 million senior secured bonds outstanding (=35% of total).
- **Undervalued small cap copper mining company with a very strong off-take partner with low credit risk in a stable jurisdiction.**

Loan Update Credit Summary: Copper Mountain Mining Corporation (Issuer #19)

Update April 2023

On April 13, 2023 Hudbay Minerals Inc. (HBM:TSX) announced that it entered into a definitive agreement to acquire Copper Mountain Mining Corporation (CMMC:TSX) in an all share US\$439M transaction. The combination will create the third largest producer in Canada based on 2023 estimated copper production.

As a reminder, the Fund established a position in the US\$250 million 8% Senior Secured Notes in June 2022 which at the time had a yield to maturity of 9.6% and was purchased at about 95 (discount to par). Closing of the proposed transaction is expected in Q3 2023 and is subject to regulatory approvals of the Supreme Court of British Columbia, the approval of at least two-thirds of CMMC shareholders, receipt of the required regulatory approvals, simple majority of HBM shareholders and other customary conditions of closing.

The proposed transaction confirms our investment thesis on CMMC in that this relatively undervalued small cap company would eventually be an attractive takeover candidate given its: 1) operations are located in politically stable jurisdictions, 2) solid near- and medium-term growth prospects driven by global copper demand and further expansion of the flagship Copper Mountain mine, and 3) strong profitability.

Investment Implications: Upon the occurrence of a change of control, Bondholders' have the right to require CMMC to make an offer to each holder of Notes to purchase such holder's Notes at a purchase price in cash of at least 101% of the aggregate principal amount of the Notes repurchased. The bond's price has since traded up to those levels and consequently we took the opportunity to sell the vast majority of our position thereby providing the Fund with a definitive exit.

Holding period Return of 18.9% (about a 10-month holding period). Return attribution: 37% from interest income and 63% upside.

AIP Performance in Bear and Bull Markets

- 10 distinct bear markets in the last 70 years. On average, a bear market happens every 7 years. Bear markets generally last less than 2 years and Bull markets last about 5 years.
- AIP Fund historically generated 6.4% in 2022 (bear market) mainly from interest/other income and averaged more than 15% per year in 2014 to 2021 (bull market) given its ability to participate in equity upside.
- We believe we are closer to the end of the bear market and could see a meaningful rebound in Q3/Q4 2023 making this an opportune time to consider allocations to the fund.

Reflects S&P 500 Index.

Source: Bloomberg, AIP, Industry sources. Bull market starts from lowest close reached after market has fallen 20% or more. Bear market starts from when the index closes at least 20% down from its previous high.

Market and Fund Outlook

In 2024 we expect the market narrative to change from rate hikes and inflation to rate cuts and credit events/risks. As such, the markets will continue to remain volatile.

Why increase your allocation to Convertible Bonds now vs other asset classes?

- Designed for times of market uncertainty
- Paid to wait (6% distribution) with downside protection. Outperforms traditional benchmarks like convertible and private debt in both bull and bear markets.
- Low correlation to other asset classes
- Deal pipeline is robust – higher quality deals with better risk/return metrics
- Longevity, track record and credit experience are key ingredients for a successful private debt allocation, especially today. AIP Fund provides all three.

These statements reflect management’s current beliefs with respect to future events and are based on information currently available to management. Forward-looking statements involve significant known and unknown risks, uncertainties and assumptions. Many factors could cause actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results, performance or achievements could vary materially from those expressed or implied by the forward-looking statements contained in this document. These factors should be considered carefully and undue reliance should not be placed on these forward-looking statements. Although the forward-looking statements contained in this document are based upon what management currently believes to be reasonable assumptions, there is no assurance that actual results, performance or achievements will be consistent with these forward-looking statements. These forward-looking statements are made as of the date of this presentation and AIP Asset Management Inc. does not assume any obligation to update or revise.
